

## *Principal's Message*

Agartala Government Medical College (AGMC) was established in 2005 to meet the medical need of the state and to impart a high standard of medical education and service to our state and the other north eastern parts of the country. With that perspective, along with students of our state a good number of students from other states are admitted to Agartala Govt. Medical College every year as per Govt. rules. It helps interaction of our students with students of other states having diverse cultures, standards, food habits, languages and grows a healthy sense of competitive attitude and national integrity amongst them, as a member of the same family of AGMC. We believe, Devotion, Integrity and commitment to the society are three basic things on the part of a doctor. Lakhs of rupees of the common people are expended to make a student a doctor. Still then the common people think 'a doctor next to God'. So every doctor and our students who are 'would be doctors' should keep it in mind and pay respect to it and they should always remember that 'the most important person' in a doctor's life is his patients, without whom all his endeavours and professional skills are in vain. We sincerely believe that lack of these things widens the distance between a doctor and his patients. Doctors who are sympathetic to their patients - particularly the poor, the underprivileged and the rural communities are the need of the state and the country. Unfortunately many of us forget it in future, but we hope our beloved students will try to bring back the name and fame of their profession and of our college, when they come to their practical professional life, so that we can be proud of them like their parents.

*Prof. Kamal Krishna Kundu*
